THE CAPITAL AND RAILROADS.

A Belief That There Should Be No Imnumber of the Change.

CHEMALIS, W. T., Sep. 2.—Chehalis is watching with considerable interest the various efforts to more the capital of the state from Olympia, end sincerely hopes it will a sunceed for the present. There are many reasons why we would like it undisturbed for the present, the principal one being the undeveloped railroad interests of Western Washington. I robably the first choice of this would be Ellemehargh, but a turn in relivond affairs might change this expect altogether. There are several companies now surveying proposed railroads in the region between Chenalis and the Columbia river. One of them has run a line over the Cascade range at the Cowlitz Pass. A road built on that route would make North Yakima nearer to the southwest and central parts of the state as it already nearer the recognition capture. There is a read to the foother spiring towns. There is a great vacant und feethe field for railroad season and central parts of the sale and road and feether alled on the railroad season and the delict for railroad season and retains the side of the railroad season and central parts of the state as it is already on the retained season.

A WORD OF CAUTION.

In this as in every other locality where it is known, there are hundreds of persons who are faking Joy's Yegatable Sarasparilla. To shose we want to say one ward. In the cases out of every ton it is effecting specific cires. But word comes to us occasionally of people who report that it operates too freely upon the bowels. We want to call the attention of those to the last that they are not fo lowing the printed instructions and are taking too much of it. If it acts too freely reduce the dose, nevertaking any more at any time than causes case and perfect section. Keep this injunction in mind, and take it regularly for a while and do not inculge in too much greaty lood, and we will have your testimonial within a fortnight. If taken under these conditions it is an absolute cure for in ligestion, dayspeaks, idek headaches, econstroation, face cruptions and liver and kidney disorders. It may be eaked how it can possibly cure so many affinants. But thereasen is clear. All those troubles are the legation feesile of improper liver angletidney action or impaired digestive organs. Its effects upon those functions are as astonishing to the racideal fraientity as to the thousands who are daily taking it. You won't? I thought 'twould make you quake,

Result of an Investigation by as "O egonian" Reporter

For the past two ears the dally press of this city have been recording the may stange and wonderful cures performed by 18 Darin at 28 Fifth street. I rom cure only to learn sometiming of the dae for and their method of free innert we concluded to yest their pariors. We found their rooms filed with patients suffering from almost covers concertable form of daes as and, much to our satt faction, upon interio, atting a minuter of the operson their as were warnedly do in more of the operson it their as were warnedly dissipating their almosts. A namoer of paraons who had not yet seen the doolors, were anxiously awanting their turn. An old man, just arrived in the city that morning from c. 1 of the mount one was spenking of the hard time he had to bind the office. PROLEMATE GROCELS

The Oregon legislature at its last session passed a datute prohibiting any person from practicing medicine or surgery without a license. This statute in substance provides that it shall not be igwist for any person to practa a medicine or surgery unless ie has received a degree from some college Luiver mity or medical school authorized to confer the same or a license obtained from the au thorized state board of examination Where the license is granted upon examination by this board \$3 must be paid for it, where it is granted upon the pre estation of a diploma \$1. The provision of the act however do not apply to persons who resided and pro-ticed medicine or surgers in Oregon when this law w excensered

This Oregon statute is substantially the same in its provisions with the statute of New Hampshire which her surreme court has recently adjudged to be unconstitutional Mr. Hanpan, a centist, was indicted for practicing dentistry without dental degree or lioense. He demurred to the indictment upon the ground that the statute, which required him to possess such a degree or heen as a prerequisite to practice was un constitutional and void This New Ramp ire stainte provides that it 'shall not be lawful for any person to practice dentistry unless he has received a dental degree from some college university or medical school authorized to confer the same, or a licel so rom the New Hampshire Bental Society Where the beense is granted upon examina tion, \$5 must be paid for it where it is granted upon the presentation of a dil long \$1. The proviators of the act however do practiced their profession in the fown or city of their present resilence during all the time since January 1 1875. The defendant in nant to the first section of the four centh amendment to the constitution of the I nited States, which provides that no state sha'l deny to any person within its jurisdiction the equal protection of the laws. He also contended that it was in violation of the provision of the New Humpshire constitution which declares that all men have the natural, essential, and inherent right of

holds the statute to be unconstitution 1 not because the legislature may not proper v re quire physicians and dentists to take out licenses, but because this particular law does not operate equally upon all persons on a grd in the same occupation. The right of the legislature to exclude unfit persons from the practice of medicine surgers and dentistry is conceded, but this power says Mr. I issue skii, inarnin' of titless for the practice of that profession, extrain persons are ex-empted from the pai ment of a license fee to which others of equal and perhips superior acquirentents and experience are subjected. Judge Cark holds that this discrimination open to objection," said Mr Justice Field are those where persons engaged if the same business are subjected to different restrictions or are held entitled to different privileges under the same conditions. It is only then that the discrimination can be said to mapair that equal right which all can olaim in the enforcement of the taws." Frederick Douglass can proceed to Ha; in now, since the war between Legitime and Hippo yte has terminated Legitime has surrentiered his capit il, and under French protection has fled from the country. The result is satisfactory to the United States as the defeated warner was not friendly to this country while his victorious antagothis country while his victorious antago-nist is disposed to cultivate friendly rela-tions with our government. A relation such as this is desired by the United States, as a coaling station could be established on the island of Hayir to advantage and that country being a rich one a profitable sid increased trade could be developed to the good of both countries.

good of both countries England has always made effort to extend her domain but this fever has only seized upon the French of recent years, and it has been frequently rumored that France had ceen requestly rumored that France had designs on Hayt. This is scarcely true The French pollucians know that the United States will permit no European nation to obtain control of affairs in the black republic The United States does not desire the control of th truk because of a historical policy of non-interference in the affeirs of other nations and even if she did, it would not pay, as the Abstinas are a turbulent, ungovernable people, and it would cost more to mainta n law and order among them than the revolutes of term the acquisition of the baland

THE VICTORIA ILMPT I

The mass meeting at Victoria E. C. with The mass meeting at Victoria & C with its somewhat willle discussion of the Bubring sea dispute is not unnatural under the circumstances but it is remarkable that the leaders of the debate should denounce the present administration for the struction. The present administration is obliged to take the inc a sid the situation made by that law passed under Cieveland's administration. The members of the Donit ion pur hament one it to know that there i no subhament on I to know that there a no sub-stantial difference between the sizers of British seal rs in Tehring sea under the law passed by the insteonires and the sexure of our American fishing vessels under a strained and obsolete construction of the fre the of 1818. When our fishing vessels were seizedishe Yunkee fi hing duries of New Lugland held just such me tings is that held it Victoria Saturday night, tulked in the same ward is way and displayed that he'd it victorit Saturday night, thised in the same warit e way and displa ed about as much ignorance in their frintic de mand for the protection of the American flag Our government did not five a shot over the matter and England will not for the common sense reason that the who e question both in the case of our seized fish question both in the case of our seized fishing resident the Attinuic scaboard and he British scalers captured in Behring sea is a subject for arbit ation not for war. The Canadian construction of the treaty of 1818 seemed a hardship to our fisherinen just, as our construction of Behring sea is a more clausium seems to the fishermen of British Counties. Are England a mined that the three mile limit should be measured from headland to headland and that under the broad doctrine of international con ity and commercial humanity proclaimed in 1830. commercial humanity proclaimed in 1830 between Engiand and America, the Ameri between Engiand and America, the American fishing vessel was at fairly entitled to humano treatment as an American Consting vessel Nevertheless, Canada treated our fishermen with great cruelty, and a violent dispute area which has not yet reached settlement Now British Columbia insists that while under our law Bebring sea is treated as a "closed sea," it is not a closed sea," at all A great many intelligent Amorianus of both parties think British Columbia is right and that ultimately the position assumed by Secretary Bayard and the last democratic congress cannot be maintained but in the meantime President Harrison has no choice but to enforce the law as i.e finds it.

The most certain and beet paying investments in any country are those made in good towns when prious were low and prior to the full growth of such towns. Throughout the eastern, middle and northwestern states railway stations average seven miles apart with good towns forty miles distant from each other, and cities of from 1000 to 60,000 inhabitants or more, seventy five miles apart. In Oregon stations, towns and cities are not so close together, but will be after the max imum in population is resched. The numb power as a LA Grande, Ora, will be fare racel cities.
